

AJAY KUMAR

Node.js Developer

PROFILE

As a skilled backend developer with three years of experience, I am passionate about building robust, efficient, and scalable web applications. I have a strong foundation in backend development and am eager to further expand my technical expertise. As a motivated self-starter, I thrive on new challenges and continuous growth. With my technical skills and dedication to software development, I am confident in my ability to contribute meaningfully to any development team.

WORK EXPERIENCE

I managed backend operations, overseeing database architecture and developing robust API solutions tailored to project requirements. I ensured seamless integration with frontend systems and maintained optimal performance and security. Here are the companies I have worked so far.

Codobux IT Services Pvt. Ltd.

June 2025 – current

Designation : Software Developer

RowthTech Pvt. Ltd.

Internship – Jan – May 2023

May 2023 – May 2025 as an **Jr Software Engineer**

PROJECTS & WORKING EXPERIENCE

Live Production Systems

Peerscroller — Live EdTech Platform (London Schools)

Handled and optimized a live production system used across London schools; improved API response times by **optimizing MongoDB queries and backend workflows**, delivered production updates, and ensured smooth daily operations.
